- Rear door

USER EXPERIENCE

Quad-Core CPU 22" touchscreen panel, 1920x1080 full HD for an e-commerce-like user experience.

The screen provides a menu where the consumer can browse product descriptions, promotional images and videos.

REAL-TIME DATA SERVICE

Magex provides a vending machine real-time management service, thanks to our web-based interface accessible from virtually any kind of device.

You can check real-time selling statistics, stock status, actual stock for every currency denomination.

You will be able to monitor the internal temperature and visualize it in a chart.

MAGEX PATENTED DISPENSING SYSTEM

Magex vending machines boast unprecedented flexibility in managing **very different items**.

Our **Conveyor patented dispensing system** fits **any kind of product**, also combining adjacent lanes to move larger products.

End-user can **easily customize lanes** setup to manage effectively any size and shape item to sell.

Moreover, interlocking partitions keep items separate into the same lane.

Our advanced multi-function self-diagnostic tool performs a continuous system health check, starting from lanes operation status before each delivery up to a full system reboot if needed.

SHUTTLE DELIVERY SYSTEM

Our internal shuttle gently delivers any kind of items in the drawer placed to the right of the window, thus leaving more space for your products.

A robotic arm moves the shuttle to the needed positions to collect every single item, providing an entertaining shopping experience.

Side photosensors recognize which product has been moved.

A small conveyor belt inside the shuttle will move the item while keeping it in the **original position**.

Magex vending machines are engineered for delicate, fragile products of any shape such as glass bottles, hi-tech items, cupcakes or eggs cases.
